PROFILE

A Front-End Developer with entry-level experience specializing in web development, HTML, and ReactJS. Adept at identifying opportunities to enhance front-end design and improve the user experience.

PROJECTS

NewsApp

Javascript | HTML | CSS

The primary objective of the Newsapp is to offer users a convenient platform for accessing diverse and up-to-date news content from various reliable sources. The app aims to deliver an intuitive and engaging interface, catering to the preferences and interests of a wide range of users.

Weather App

Javascript | HTML | CSS

The Weather App is developed to offer users a straightforward and informative interface for accessing accurate weather forecasts based on their location or specified locations. Utilizing modern web technologies, the app delivers a seamless user experience and provides valuable meteorological data from trusted sources

Movie Finder

Javascript | HTML | CSS

The Movie Finder App serves as a comprehensive platform for users to discover information about movies, including details such as plot summaries, cast, ratings, release dates, and more. It leverages modern web technologies to deliver an intuitive and interactive interface for movie enthusiasts and casual users alike.
